Eastern Regional Meeting Abstracts Subject Index

A
Accreditation Council for Graduate Medical Education, re-examination of resident sleep, mental health, education, and safety seven years later by, on duty hour limits for resident physician, P9

Acute coronary syndrome (ACS) comparisons of speckle tracking echocardiography, tissue doppler imaging and transmitial flow velocity, to estimate diastolic function in, P3
mortality prediction using speckle tracking echocardiography, by determining diastolic function, 2

Acute kidney injury (AKI), urinary biomarker for, 12

Acute ST elevation myocardial infarction (STEMI) paradoxical embolus across patent foramen ovale as etiology of, P5
sensitivity and specificity of left bundle branch block, as ST segment elevation equivalent, in, P6
Adenosine A\(_2\) receptor, effect of, on lectin like oxidized low-density lipoprotein receptor-1 expression, 13

Adverse drug events, recognizing opioid and benzodiazepine related, in children through an automated detection system, P13

Angiotensin II converting enzyme inhibitors and angiotensin II receptor blockers, in reduction of ventricular arrhythmia, P7

Aortic valve replacement vs. medical therapy for acute kidney injury, in with critically ill children, 12

Forearm fractures factors associated with orthopedic intervention for pediatric, P25
risk, predictors of, in African American children, P24

Asthma association between mold and, in an urban inner-city pediatric population, P33
association of osteopontin with pediatric asthma, P30

Asthmatic airway epithelium beneficial glucocorticoid effects in, 10
normal airway epithelial mitotic regeneration reduction by secretion of, P31
reduction of intrinsic inflammation in, by synchronized mitosis, 6

B
Biomarkers for quantitative proteomic screening of stroke progression, 1
uninary, for acute kidney injury in children with critical illnesses, 12

Cardiac PFO physiology, effect of, on circulatory proteomic profile, in stroke patients, P27
Cardiac surgery, effect of race on all-cause mortality after, 3
C-arm computed tomography, role of, in the treatment of venous malformations and prediction of local skin complications, 7

C
Chlorinated dopamine, neurotoxicity of, P28
Coxibs, atherogenic properties of, in human monocytes/macrophages, 15

D
Diabetes, effect of, on short and long term outcomes in patients undergoing valvular operations, P8

Diastolic function comparisons of speckle tracking echocardiography, tissue doppler imaging and transmitial flow velocity, in acute coronary syndrome patients, to estimate, P3
measurement by speckle tracking echocardiography, to predict acute coronary syndrome mortality, 2

Digital thermal monitoring (DTM) vs. nuclear stress testing, outcomes of, P2

Early Head Start (EHS) Program, resident education in, P10

Familial polycythemia vera, in iron deficiency anemia patient, P17
FGF-2 urinary biomarkers, for acute kidney injury, in with critically ill children, 12

Forearm fractures factors associated with orthopedic intervention for pediatric, P25
risk, predictors of, in African American children, P24

Glucocorticoid, effects of, in asthmatic airway epithelium, 10

Gonadotropin releasing hormone deficiency, olfactory phenotyping in, 4

H
Hematologic malignancy and renal cell carcinoma, association between, P22
Hemolysis, comparison of, between the centrifugal and roller-head pumps, during ECMO at low flow rates, P15

Hepatitis C virus patient, necrolytic acral erythema characteristics in chronic, P19
Home fire safety practices, in an urban pediatric emergency department population, P11
Hydralazine and isosorbide dinitrate (HYD-ISDN) therapy, low usage of, in eligible heart failure patients during hospitalization or at discharge, P4

I
Iron deficiency anemia patient, familial polycythemia vera in, P17
Isolated valve operations, long term results of, in diabetes patients, P8

L
Lateral medullary infarct, presentation of vomiting and vertigo as, P26
Lectin like oxidized low-density lipoprotein receptor-1 (LOX-1), expression of, in endothelial cells mediated by adenosine A\(_2\) receptor, 13

Left bundle branch block (LBBB), sensitivity and specificity of, as ST segment elevation equivalent, in acute ST elevation myocardial infarction management, P6

Left ventricular ejection fraction (LVEF), augmentation of, during gated single photon emission computed tomography myocardial perfusion imaging, stress induced, 9

Left ventricular mass index (LVMI), prediction of increased, by single measurement, P1

M
Malaria treatment delays, pediatric, across socioeconomic levels in suburban Accra, Ghana, P14
Mold and asthma, association between, in an urban inner-city pediatric population, P33

N
Necrolytic acral erythema, characteristics of, in chronic hepatitis C virus patient, P19

O
Olfactory phenotyping, in isolated gonadotropin releasing hormone deficiency, 4

Osteopontin, association of, with pediatric asthma, P30

Ovarian reserve, pubic gray hairs as predictive value for, P23

Oxygen tension, effect of, on release of adenosine from astrocytes, 11

P
Paradoxical embolus across patent foramen ovale, as etiology of acute ST elevation myocardial infarction, P5

Patent foramen ovale (PFO) effect of cardiac, on circulatory proteomic profile in stroke patients, P27
paradoxical embolus across, as etiology of acute ST elevation myocardial infarction, P5

Perinatal brain injury, placental hypervascularity effect in, P29

Placental hypervascularity, effect of, in perinatal brain injury, P29

Platelet-induced splenocyte apoptosis, inhibition of, by GPIIb/IIIa blockade, during sepsis, 14

Pneumonia, implementation and impact of a consensus diagnostic and management algorithm for complicated, in children, P12
Proteomic techniques, stroke biomarker screening using, 1
Pubic gray hairs, quantity of, as a predictor of diminished ovarian reserve, P23
Renal cell carcinoma and hematologic malignancy, association between, P22
Resident education, in an Early Head Start Program, P10
Respiratory infections and vitamin D, association between, P32
Sarcoidosis, unusual presentation of, P18
Sedatives drugs, indications and complications of using, among in-hospital elderly patients, P20
Sepsis
  inhibition of platelet-induced splenocyte apoptosis, by GPIIB/IIA blockade, during, 14
  related mortality in lacking granzyme B, 8
Sickle cell disease patients, transfusion support for, undergoing non-myeloablative stem cell transplantation, P16
Single photon emission computed tomography myocardial perfusion imaging, augmentation of stress induced left ventricular ejection fraction, during, 9
Speckle tracking echocardiography comparisons of, with tissue doppler imaging and transmitral flow velocity, to estimate diastolic function in acute coronary syndrome patients, P3
prediction of acute coronary syndrome mortality using, by determining diastolic function, 2
Stroke patient cardiac PFO physiology effect, on circulatory proteomic profile in, P27
quantitative proteomic screening of, using biomarkers, 1
Syncope, etiologies, risk factors and long-term mortality in patients hospitalized for, P21
Transfusion support, characterization of, in sickle cell disease patients, undergoing non-myeloablative stem cell transplantation, P16
Uncommon disorder, rare initial presentation of, P18
Urinary biomarker, for acute kidney injury in critically ill children, 12
Ventricular arrhythmia, reduction of, by angiotensin II converting enzyme inhibitors and angiotensin II receptor blockers, P7
Vitamin D and respiratory infections, association between, P32
