Eastern Regional Meeting Abstracts Subject Index

A
Abnormal ECG, analysis and outcomes, patients in urban academic pediatric emergency department, P6
Advanced systolic heart failure, assessment of uses of implantable cardioverter-defibrillator in African American patients with, P10
African American children, bone mineral density and vitamin D status, forearm fractures in, 12
African American patients, assessment of uses of implantable cardioverter-defibrillator in patients with advanced systolic heart failure, P10
Airway epithelium, TGF-β1 production by inducing mitotic dysynchrony in, P3
Airway secretome, directional development in asthmatic epithelium using in vitro wound repair model, 14
Alumni Association (AA), to solve mutual problems challenging students and alumni, P26
Ambulatory Holter monitoring, prognostic significance of frequency and morphology of premature ventricular complexes during, P1
Antiphospholipid antibody elevation, associated with silent strokes in patients with patent foramen ovale, 6
Antiretroviral resistance, prevalence rate in HIV treatment-naïve patients, P19
Aortic stenosis and normal left ventricular ejection fraction, diastolic function and survival assessment in, 3
Asthmatic airway cells, estrogen inhibits TGF β 1-induced epithelial-mesenchymal transition in, P7
Asthmatic epithelium, directional airway secretome development using in vitro wound repair model, 14
Bone mineral density (BMD) in men, isolated with GnRH deficiency is associated with silent strokes in patients with patent foramen ovale, 6
BRCA mutation, age at cancer diagnosis depends on parent origin of, 14
Bronchial casts, proteomic analysis in, from BRCA mutation, age at cancer diagnosis, depends on parent origin of, 12
C
Cancer diagnosis, depends on parent origin of BRCA Mutation, 14
Cardiac troponin I, hospitalized patients with pneumonia in, prognostic value of, 4
Celecoxib, prostaglandin (PG)D2 receptor ligation counters atherogenic effects and restores cholesterol efflux pathways in THP-1 human macrophages, P27
Cerebrospinal fluid metalloproteinase-9 elevation, associated with poor 6-month outcome following subarachnoid hemorrhage, 11
Chronic rhinitis, relationship among fibromyalgia and, P13
Cirrhosis diagnosis, during hepatocellular carcinoma screening, negligible impact on mortality and low liver transplantation rates, P23
Cold agglutinin disease, treatment using rituximab, P16
Congenital heart disease, proteomic analysis of bronchial casts from patients with, P4
CTSA-wide exchange, of experiences and appetites: RU-BERD evaluation tools suite, P20
D
Defibrillator pad, sizing and position placement among emergency medical care providers for children, P11
Diastolic function and survival, patients with severe aortic stenosis and normal left ventricular ejection fraction, 3
Directional airway secretome development, in asthmatic epithelium using in vitro wound repair model, 14
Echocardiographic assessment, of heart failure, utility of flexypnea induction in, P12
Emergency department (ED) care, pediatric forearm fractures: factors associated with orthopedic follow-up, 10
Emergency department disposition, relationship between pediatric early warning score and, P4
End-organ apoptosis, platelet Granzyme B induces contact-dependent, during murine sepsis, 1
Enthesitis-related arthritis, early disease characteristics and reveals elevated transforming growth factor-beta1, 13
Epithelial-mesenchymal transition, TGF β 1-induced, estrogen inhibits in asthmatic airway cells, P7
Erdheim-Chester disease (ECD), natural history of, P15
Estrogen, inhibits TGF β 1-induced epithelial-mesenchymal transition in asthmatic airway cells, P7
F
Fibromyalgia, relationship among rhinitis and, P13
Flexypnea induction, in echocardiographic assessment of heart failure, P12
Forearm fractures, pediatrics
Bone mineral density and vitamin D status in African American children, 12
Factors associated with orthopedic follow-up after discharge from the emergency department, 10
Genome Wide Association Studies, translating into a tool for personalized medicine, P21
Hepatocellular carcinoma screening, during cirrhosis diagnosis negligible impact on mortality and low liver transplantation rates, P23
HIV positive patients, reproductive options for, in United States, P9
HIV treatment, prevalence of antiretroviral resistance in treatment-naïve patients, P19
Human airway epithelial cell, simvastatin effects on, viability and morphology of, 8
Hypothyroidism, treatment-naïve patients, associated with silent strokes in patients with patent foramen ovale, 6
Ictal depth electroencephalography, concordant with interictal magnetoencephalography, postoperative seizure outcomes during, P22
Implantable cardioverter-defibrillator, assessment of uses in African American patients with advanced systolic heart failure, P10
Intercital magnetoencephalography, concordant with ictal depth electroencephalography, postoperative seizure outcomes during, P22
Labor and delivery, quality improvement in patient care on, P8
Left ventricular ejection fraction, aortic stenosis and diastolic function and survival assessment, 3
Low spinal bone mineral density, men isolated with GnRH deficiency is related to degree of pubertal activation of hypothalamo-pituitary-gonadal axis, 2

**M**

Metalloproteinase-9, elevated cerebrospinal fluid, associated with poor 6-month outcome following subarachnoid hemorrhage, 11

Mitotic dysynchrony induction, in normal airway epithelium leads to TGF-β 1 production, P3

Mortality and morbidity, race influences following cardiac surgery, P18

Murine sepsis, platelet Granzyme B induces contact-dependent end-organ apoptosis in, 1

**N**

Non ST-elevation myocardial infarction, red blood cell distribution width as a predictor of readmission in patients with, P2

**O**

Orthopedic follow-up, pediatric forearm fractures, after discharge from the emergency department, 10

**P**

Patent foramen ovale (PFO), antiphospholipid antibody elevation is associated with silent strokes, in patients with, 6

Pediatric care providers, knowledge of appropriate sizing and defibrillator pad position placement among, P11

Pediatric early warning score, relationship between emergency department disposition and, P4

Pediatric emergency department, analysis and outcomes of abnormal ECGs in a cohort of patients seen at, P6

Pediatric forearm fractures bone mineral density and vitamin D status in African American children, 12 factors associated with orthopedic follow-up after discharge from the emergency department, 10

Platelet aggregation decreases, due to platelet GPIIb/IIIa inhibition, 7

Platelet GPIIb/IIIa inhibition, decreases platelet aggregation but no effect on granule release, 7

Platelet Granzyme B, induces contact-dependent end-organ apoptosis during murine sepsis, 1

Pneumonia, prognostic value of cardiac troponin I, hospitalized patients with, 4

Post-nephrectomy population, renal cyst growth in, P24

Premature ventricular complex, prognostic significance of frequency and morphology of, during ambulatory Holter monitoring, P1

Prostaglandin (PG)D2 receptor, ligation counters atherogenic effects of celecoxib and restores cholesterol efflux pathways in THP-1 human macrophages, P27

Proteomic analysis, of bronchial casts from patients with sickle cell disease/congenital heart disease, P4

**R**

Race, influence on mortality and morbidity following cardiac surgery, P18

Red blood cell distribution width, as a predictor of readmission in patients with unstable angina/non ST-elevation myocardial infarction, P2

Relationship among fibromyalgia and rhinitis, P14

Renal cyst, growth in the post-nephrectomy population, P24

Reproductive options, for HIV positive patients in United States, P9

Rhinitis, relationship among fibromyalgia and, P13

Rituximab, for treatment of cold agglutinin disease, P1

RNA interference and immunofluorescence microscopy, characterization of a Brugia malayi-encoded human IL-5 receptor antagonist (BmIL-5Ra) by, 9

RU-BERD evaluation tools suite, towards a CTSA-wide exchange of experiences and applets, P20

**S**

Sepsis, platelet Granzyme B induces contact-dependent end-organ apoptosis in, 1

Sickle cell disease, proteomic analysis of bronchial casts from patients with, P4

Silent strokes, associated with antiphospholipid antibody elevation, in patients with patent foramen ovale, 6

Simvastatin, effects of on human airway epithelial cell viability and morphology, 8 SNPs to epistatic regions, translating GWAS into a tool for personalized medicine, P21

Strokes patients, associated with antiphospholipid antibody elevation, in patients with patent foramen ovale, 6

Subarachnoid hemorrhage, elevated cerebrospinal fluid metalloproteinase-9 associated with poor 6-month outcome following, 11

Successful therapy of cold agglutinin disease utilizing rituximab, P17

Syncope, investigate etiologies and risk factors for mortality and rehospitalization in patients at 17- month follow-up, P25

**T**

TGF-β1 production, inducing mitotic dysynchrony in normal airway epithelium leads to, P3

THP-1 human macrophages, prostaglandin (PG) D2 receptor ligation counters atherogenic effects of celecoxib and restores cholesterol efflux pathways in, P27

Transforming growth factor-beta1 (TGF-beta1), early disease characteristics of enthesitis-related arthritis, elevation of, 13

Triage, definition, P8

**U**

Unstable angina, red blood cell distribution width as a predictor of readmission in patients with, P2

Urban academic pediatric emergency department, analysis and outcomes of abnormal ECGs in a cohort of patients seen at, P6

Ventricular ejection fraction, diastolic function and survival assessment, 3

Vitamin D status, bone mineral density and, in African American children with forearm fractures, 12

**W**

Wound repair model, in vitro method, of directional airway secretome development in asthmatic epithelium, 14
