Western Abstracts Subject Index

A
Abdominal pain, in lung transplant recipient with cystic fibrosis, 130
Abductor footprint loss, with cephalomedullary nail reaming, 240
Academic plastic surgery center, Affordable Care Act impact on payor mix, 164
Acneiform lesion prevalence in patients 50 years of age and older, magnetic resonance arthography and, 137
Acromioclavicular separation, heterotopic ossification after non-operative management of, 175
Activated dendritic cells, immune monitoring of solid tumor patients, receiving intratumoral injection of, 383
Active shooter education for pediatrics, medical simulation as tool for, 169
Acute inflammatory response and myogenesis during skeletal muscle reload in the mouse model of LGMD2A, 123
Acute kidney injury (AKI) cisplatin-induced, CXCR2 knockout effect on, using therapeutically relevant cisplatin dose, in mice with cancer, 307
diagnostic reliability, in administrative records, of hospitalized patients, 308
following spinal instrumentation surgery in children, 220
sudden cardiac death incidence of
post-contrast, 88
Acute lymphoblastic leukemia (ALL) xenograft model, disease mechanisms identification and therapies for CRLF2 B cell, 106
Acute myocardial infarction (AMI) geographic variation in treatment and outcomes among patients hospitalized with, 280
medication therapy at discharge for
patients hospitalized with, 1
Acute renal failure and urosepsis, as failure to gain weight, in well appearing neonates, 400
Acute subclinical maternal inflammation, 25(OH)2D3, hyperoxia-induced neonatal gain weight, in well appearing neonates, 400
Alzheimer’s disease (AD) early vs. late-onset, traumatic brain injury (TBI) prevalence in, 312
glatiramer acetate (GA)-induced EGR-1 cells and, 42
bone marrow-derived mesenchymal stem cells and, 42
Alzheimer’s disease (AD)
early vs. late-onset, traumatic brain injury (TBI) prevalence in, 312
vascular system, failure of, in children with cardiomyopathy, 111
Angiitis central nervous system, fatal cerebral angiitis central nervous system, fatal cerebral angiitis central nervous system, fatal cerebral angiitis central nervous system, fatal cerebral angiitis Autoimmune disease patients, contraindication for heart transplantation, 183
Automated ventilator waveform analysis, pipeline development for, 355
Autopsy to assess causes of infant death in Enugu Nigeria, feasibility of using verbal, 71

**B**

Back pain, granuloma, 398
Basal cell carcinomas (BCCs), aggressive type of murine, 102
B cell acute lymphoblastic leukemia (B-ALL), xenograft model, disease mechanisms identification and therapies for CRLF2, 106
B-cell lymphoma, minimal residual disease associated with mitochondrial DNA in, 387
Bedside data display, improving diagnostic accuracy & efficiency by optimization of, 50
B3GAT3-related linkopathy, phenotype of, 298
Bicortical screws vs. lag screws in metacarpal fixation, 248
Bilateral breast reconstruction, in patients with genetic susceptibility, family history and cancer phobia, 325
Bilingual meal guides specialized for low income families, healthy eating made easy, 69
Bilirubin photoalteration under blue and blue-green light, hematocrit in vitro, 159, 206
Biomarker assays, associated with diagnosis and early detection, of Alzheimer’s disease (AD), 318
Birth attendant compliance, with evidence-based interventions, for immediate newborn care, in Indian hospital deliveries, 368
Bleomycin-induced lung injury, in mice expressing human carcinobryonic antigen cell adhesion molecule 6, 116
Blood brain barrier, mild traumatic brain injury

**C**

Calcium channels, L-type influences calcium waves after long-term hypoxia and maturation, 40
Cancer phobia, family history and genetic susceptibility, bilateral breast reconstruction in patients with, 325
Cancer stem-like phenotypes, AXIN2 predicts invasiveness, 168
Candida tropism and aortectasia, female child

**D**

Cancer phobia, family history and genetic susceptibility, bilateral breast reconstruction in patients with, 325
Cancer stem-like phenotypes, AXIN2 predicts invasiveness, 168
Candidate locus identification at 8q21 among children with cancer phobia, 325
Candida tropism and aortectasia, female child

**E**

Cataract extraction incidence over 14 years, posterior chamber piol implantation and, 246
CCL3 absence, experimental otitis media and impairments host defense of the middle ear, 26
CD28-CD80 costimulation, in T cells expressing chimeric antigen receptors with costimulatory CD28 domains, 103
CD40 adipose tissue macrophage correlates with body fat in healthy non-obese men, diminished expression of, 9
Cell based therapies and inflammation, role of interleukin 1 (IL-1), in heart failure (HF), 407
Central nervous system angiitis, fatal cerebral edema with, 316
Cephalomedullary nail reaming, abductor footprint loss with, 240
Cerebellar hemorrhage in extremely low birth weight infants, 47
Cerebral lacate concentration, therapeutic hyperthermia in neonates with hypoxic ischemic encephalopathy, 213
Cerebral palsy, pes planus clinical assessment in children with, 250
Cervical cancer, prevention screening in El Salvador, 92
Cervical plexus block for ipsilateral shoulder pain after thoracotomy, 225
Chewelah, increasing the physical activity of women in Chewelah, WA through the organization of a woman’s walking club, 58
Childhood B-cell lymphoma, minimal residual disease associated with mitochondrial DNA in, 387
Childhood maltreatment, Safe Environment for Every Kid (SEEK) questionnaire, to identify psychosocial stressors faced by parents, in pediatric resident clinic, as Phase I of QI project to prevent, 335
Children with cerebral palsy, pes planus clinical assessment in, 250
with human metapneumovirus in hospitalized, 290
with neural tube defects in Eastern China, 276
obesity intervention, Fish to Preschools Program for, in Alaska, 337
pre-auricular sinuses (PAS), prevalence and ethnic variation of, 323
Walking School Bus (WSB) program, to increase physical activity and active transportation of, in Ellensburg, 334
zolpidem vs. midazolam, as oral premedication in, 176
Chimeric antigen receptor (CAR), CD28-CD80 costimulation in T cells with costimulatory CD28 domains, 103
Chitosan nanoparticles for the treatment of Sepsis, 32
Chloride channel, protein abundance is persistently elevated during evolution of neonatal chronic lung disease in preterm lambs, 111
Cholestatic, mutations in farnesoid X receptor gene NR1H4, 202
Cholinergic modulation, corticostriatal glutamate release, 120
Chorioamnionitis associated with antibiotic treatment in asymptomatic late preterm and term neonates, 48
outcomes of asymptomatic late preterm and term neonates with non-routine use of empiric antibiotics, 45

**J**

Journal of Investigative Medicine • Volume 63, Number 1, January 2015
in rat model, hypoxia-ischemia and intra-amniotic lipopolysaccharide (LPS)-induced inflammation causes, 347

Chrome-cobalt hip implants, wear/corrosion of, 327

Chronic hypoxemia decreased glucose stimulated insulin secretion (GSIS) following, due to intrinsic islet defect, in fetal sheep, 348
effect on hepatic glucogenesis, in fetal sheep, 350

Chronic hypoxia influence and oxidative stress on Ca2+ sparks in pulmonary arterial myocytes of adult sheep, 134

Chronic lung disease in preterm lambs, chloride channel protein abundance is persistently elevated during evolution of, 111

CHST6 mutation in individual with macular corneal dystrophy, 229

Cicatricial alopecias, depression in patients with, 341

Cisplatin-induced acute kidney injury (AKI), CXCR2 knockout effect on, using therapeutically relevant cisplatin dose, in mice with cancer, 307

Clear ballistics gel phantom, ultrasound training, 243

Cleaver technique effect and time on laser fiber power output on, 227

Cle Elum community teaching garden, for young people, 336

Closed head injury (CHI) in mice, 419
candidate locus evaluation for, at chromosome 12q24, 293
candidate locus identification at 8q21 among infants, 157
candidate locus identification for, at distal chromosome 8q21 among infants, 292
Continuous venovenous hemofiltration in critically ill patients, energy supply from, 191
Contrast-enhanced MRI predictive imaging of, oophoromyelo squamous cell cancer (OSCC) patients with, 419
Copenhagen® and iqmik effect, on wound healing in oral epithelium, 345
Coronary artery bypass grafting, left greater saphenous vein is the preferred conduit for, 8
Coronary reperfusion in maximizing neurologically intact survival after cardiac arrest, hypothermia and, 6
Corticotriatal glutamate release, cholinergic modulation, 120
Craniofacial microsoma treatment, microtia reconstruction, 222
Craniosynthesis surgery, blood loss and perioperative fluid management, 255
Criocarotenoid and vocal cord paralysis, in Cystic fibrosis, abdominal pain in lung day, 35
Depression and education practices in rural sheep, 348
intrinsic islet defect, in fetal hemochromatosis, using electronic medical records, 152
with, 319
susceptibility weighted imaging (SWI) and medullary veins, association on in cicatricial and non-cicatricial alopecia among Hispanic Americans, excessive daytime sleepiness as an indicator, 146, 261
in cystic and non-cysticarial alopecia patients, 341
whole body hyperthermia, 262
Depyrogenation, with non-thermal nitrogen gas water in a population of children in the Indian Himalayas, 265

Diabetes associated ketoadiposis, hematuria presenting symptom, 73
awareness in Nepal through community education, 94
education among community health workers in Naivasha, Kenya, 93
Diarrheal rates, hand washing and drinking safe water in a population of children in the Indian Himalayas, 265

Diet effect, on hypothalamic feeding circuitry, to insulin, 437
Diffusion tensor imaging (DTI) tractography, reliability of, for facial nerve imaging, in patients with vestibular Schwannoma (VS), 363
DNA repair-deficient malignancies, optimized lupus autoantibody fragment for targeted therapy of, 101
Donor human milk availability, impact on necrotizing enterocolitis (NEC) and breast milk feeding, in very low birth weight infants, 300
Donor specific antibodies (DSA), relevance after heart transplantation, 3
Driveline infections (DLI) risk, in heart transplant patients treated with anti-thymocyte globulin (ATG) induction therapy, 408
Dysphagia association with esophageal manipulation, after cardiac surgery, 360
targeted swallow screening for post-cardiac surgery, 239

E
Early vs. late-onset Alzheimer’s disease, traumatic brain injury (TBI) prevalence in, 312
Eculizumab, in renal recovery in child with atypical hemolytic uremic syndrome and homozygous deletions of complement factor H related proteins 1 and 3, 171
Effective communication, families of hospitalized children and health care providers, 174
Elderly women with anti-dsDNA and CCP antibodies, crioceratoidenitis and vocal cord paralysis in, 393
Elective surgery procedures, retrospective autopsy series, 221
Electronic medical records, assessing penetrance of hemochromatosis, in population of C282Y homozygotes using, 152
Electronic methods, to curb irresponsible drinking in Butte adolescents, 145
Electronic screening and brief intervention (e-SBI) protocol, to prevent irresponsible drinking in Butte adolescents, 145
Exosome isolation, optimization of, from human saliva, 313
Exosomes decreases pancreatic cancer cell viability, curcumin uptake via, 110
Explant analysis from a patient with inflammatory stress, macrophage regulation with dysphagia, after cardiac surgery, 360
Extracorporeal membrane oxygenation (ECMO) outcomes, financial burden of, 324
Extremely low birth weight (ELBW) infants, 317
Exosome-mediated pancreatic cancer cell proliferation, 420
Facial nerve palsy (FNP), eyelid position, in facial nerve imaging diffusion tensor imaging of patent ductus arteriosus in, 160
Flu, increasing staff compliance with influenza vaccination, 273
Foot strike pattern and injury, characterization of, in ultramarathon athletes, 342
Fetal pancreatic progenitor cells, HIP2B effects on PDX1 and GRB2 expression, 190
Fetal ultrasound findings, associated with parental nutrition (PN) duration, in intestinal atresias, 306
Fiberoptic bronchoscopic cryoextraction, safety and clinical utility of, in patients with non-neoplastic tracheobronchial obstruction, 353
Fibrosis-related gene and microRNA expression, in pediatric idiopathic dilated cardiomyopathy (IDC), 406
First attempt success (FAS), neuromuscular blocking agents (NMBAs) effect on, during intubation, in intensive care unit, 354
Flat epithelial atypia (FEA) on breast biopsy specimens, diagnostic agreement among pathologists, 18
Flow disruptions (FD) in robotic-assisted urogynecology surgery, surgeon experience and patient age on, 251
Fluoroscopy vs. radiodination method, for surface E-selectin site density determination, 372
Fontan patients undergoing orthotopic heart transplant, perioperative prognostic factors for, 180
Ganglioside GD2 expression, in osteosarcoma patients, 386
Gastric motility disorders, ultrasound as potential tool for the diagnosis of, 194
Gastrochisis and maternal intake, of phytoestrogens, 299
Gene expression in BMP-4/9, vascular endothelial cell network, 2
Genetic mutations, psychiatric disorders in children, autism spectrum disorders associated with, 81
Genetic susceptibility, family history and cancer phobia, bilateral breast reconstruction in patients with, 325
Glialtamer acetate (GA)-induced EGR-1 expression, immune-modulation therapy with, in rodent models, of glaucoma and Alzheimer’s disease, 438
Glaucoma glialtamer acetate (GA)-induced EGR-1 expression, immune-modulation therapy with, in rodent models of, 438 and obstructive sleep apnea syndrome (OSAS), association between, in medicare beneficiaries, 344
Glioblastoma, temozolomide rechallenge is an effective treatment for first tumor recurrence in patients with, 124
Glucose homeostasis and growth, maternal zinc deficiency on offspring safety, 10
Glucose tolerance or β-cell function in type 2 diabetes is not improved by antioxidant N-acetylcysteine, 188
Gram positive bacteria against novel antibiotics, preclinical development of, 156
preclinical development, antibiotics against, 29
Granulomatous lymphocytic interstitial lung disease (GL-ILD), common variable immunodeficiency, 129
Group C streptococcus infection causing rheumatic heart disease, in child, 397
Growth hormone treatment on intelligence test and molecular subtypes in Prader-Willi syndrome, 200
Gut-homing immune cells, dendritic cells stimulation, 25

Hand hygiene resources and knowledge, attitudes and practices of healthcare professionals at a regional hospital in Uganda using WHO toolkit, 282
HDL-mediated eNOS activation falls before the onset of T2DM in obese non-human primates, 11
Headaches, head imaging in primary care settings, ordering patterns, cost, and outcome analysis for, 340
Head trauma, head imaging in primary care settings, ordering patterns, cost, and outcome analysis for, 340
Healthcare and acute services for intravenous drug users in a rural community, 70
providers and families of hospitalized children, effective communication of, 174
Health insurance, for the uninsured in Twin Falls, Idaho, 68
Health related quality of life (HRQoL) questionnaire, in adolescent idiopathic scoliosis, paper vs. internet administration of, 375
Healthy eating made easy, bilingual meal guides specialized for low income families, 69
Heart change in weight post-total artificial, 54
Heart defects, conotruncal candidate locus evaluation for, at chromosome 12q24, 293
candidate locus identification for, at distal chromosome 8q21 among infants, 292
Heart failure (HF) in children, serum response factor in, 177
role of interleukin 1 (IL-1), cell based therapies and inflammation in, 407
Heart transplantation anti-HLA antibodies relevance after, 3
anti-HLA antibody development following, 90
benefit of renal sparing protocol across time post, 89
Fontan patients undergoing orthotropic, perioperative prognostic factors for, 180
HLA antibody class development, 410
patients driveline infections (DLI) risk in, treated with anti-thymocyte globulin (ATG) induction therapy, 408
patients outcomes in, Bw4 and Bw6 antibodies development, 5
patients with autoimmune disease: not a contraindication for, 243
posterior reversible encephalopathy syndrome (PRES) risk, children with pretransplant Glenn/Fontan physiology after, 409
proliferation signal inhibitors after, malignancy development, 178
regadenoson scan, predictive of poor outcome, 179
Hedgehog signaling in mice, tracheo-esophageal fistula resulting from genetic mesodermal interruption of, 215
Helium-oxygen divers, arterial blood changes during exercise in, at 10 atmospheres, 352
Hematocrit effect on in vitro bilirubin photoalteration under blue and blue-green light, 159, 206
Hematuria, presenting symptom in new onset diabetic ketocidosis, 73
Heme oxygenase (HO) activity, in vivo
Heme oxygenase-1 promoter polymorphisms, and spina bifida risk, 295
Hemochromatosis, penetrance assessment, in population of C282Y homozygotes using electronic medical records, 152
Hepatic glucogenesis, chronic hypoxemia effect on, in fetal sheep, 350
Hereditary hemochromatosis (HH), C282Y homozygotes using electronic medical records, 199
Highly refractive infantile spams (IS), ketogenic diet, for treatment of, 315
High-risk adolescents, Screening, Brief Intervention and Referral to Treatment (SBIRT) use of, 405
Hip arthroplasty, explant analysis from a patient with hypercoebaltemia and acceleration of Parkinsonism following metal-on-metal hip arthroplasty, explant analysis from a patient with, 258
Hyperglycemia in a mouse model of osteoarthritis, osteophytes with, 136
Hyperoxia-induced neonatal lung injury, with hypercoebaltemia and acceleration of Parkinsonism following metal-on-metal hip arthroplasty, explant analysis from a patient with, 258
Hyperthermia, major depression, whole body, 262
Hypocalcemia and acceleration of Parkinsonism following metal-on-metal hip arthroplasty, explant analysis from a patient with, 258
Hypoglycemia and coronary reperfusion in maximizing neurologically intact survival after cardiac arrest, 6
Hypoxia and maturation of L-type calcium channels influences calcium waves after long-term, 40
HIV infected men who have sex with men and transgender women in Lima, Peru, effect of coping style on linkage to care and mental health, 36
infected patients, association with shorter telomeres, and HIV impact on ageing, 343
infection and shorter telomeres, 151
or AIDS mentorship in Northern and Central Malawi health facilities, 275
positive patients, primary anal small cell carcinoma in, 384
with STI continuum of care in Hanoi, Vietnam, male sex workers, 271
testing in high-risk men who have sex with men and transgender women in Lima, Perú, 35
Home oxygen therapy, requirement for, in preterm infants born before 28 weeks gestation, 305
Homozygote deletions of complement factor H related proteins 1 and 3, renal recovery with eculizumab in child with atypical hemolytic uremic syndrome, 171
Hospital-acquired infections in a tertiary intensive care nursery in Vietnam, 232
5-HT6 receptor expression, nucleosome accumbens on cocaine self-administration, 119
Human metapneumovirus in hospitalized, high-risk pediatric population, 290
Human non-small cell lung cancer (NSCLC), with reduced Sma4 expression, increased responsiveness to DNA topoisomerase inhibitors, 388
Human saliva, exosome isolation from, 313
Hygiene awareness to reduce hospital acquired infections at the Uganda Cancer Institute, 97
Hyperbilirubinemia efficacy and safety of a new heme formulation for use in the study of neonatal, 212
Hypercoebaltemia and acceleration of Parkinsonism following metal-on-metal hip arthroplasty, explant analysis from a patient with, 258
Hyperglycemia in a mouse model of osteoarthritis, osteophytes with, 136
Hyperoxia-induced neonatal lung injury, 1a,25(OH)2D3, 112
Hypertension development of a community-based educational program on, 85
pediatric sweet syndrome and pulmonary, 53
risk factors for postpartum readmission for, tertiary hospital center, 153
tertiary hospital center, postpartum readmission for, 17
Hypothermia, major depression, whole body, 262
Hypothalamic feeding circuitry, to insulin, diet
Hyperthermia, major depression, whole body, 262
Hypocalcemia and acceleration of Parkinsonism following metal-on-metal hip arthroplasty, explant analysis from a patient with, 258
Hypoxia and maturation of L-type calcium channels influences calcium waves after long-term, 40
on RYR activity in high altitude acclimatized fetal and adult sheep, 44
Hypoxia-induced right ventricular hypertrophy, histone deacetylase inhibition abrogates, 4
Hypoxic ischemic encephalopathy cerebral lactate concentration with therapeutic hypothermia in neonates, 213
deep medullary veins (DMV), qualitative vs. quantitative analyses of; on susceptibility weighted imaging (SWI), in pediatric patient with, 320

Volume 63, Number 1, January 2015
Western Abstracts Subject Index

Idiopathic dilated cardiomyopathy (IDC)
dietary, 94
Idiopathic pulmonary fibrosis (IPF)
small molecules, 12
translation of, 304
from induced pluripotent stem cell model of, to bleomycin mouse model, 356
translation of small molecules therapies from an induced pluripotent stem cell model to bleomycin mouse model, 163

LgM-mediated phagocytosis
Staphylococcus aureus in microglia, comple ment receptor 3, 24

Immunodeficiency, granulomatous
lymphoctic interstitial lung disease (GL-ILD), 129

Infant
cerebellar hemorrhage in extremely low birth weight, 47
tenteral feeds, pH and potential renal solute load (PRSL) of, 301
extremely low birth weight, antenatal factors associated with closure of patent ductus arteriosus in, 160
hospitalization, screening for maternal postpartum depression, 172
less than 500 grams-a single center hospitalization, screening for maternal postpartum depression, 172
preterm born before 28 weeks gestation, 166
very low birth weight, donor human milk availability, impact on necrotizing enterocolitis (NEC) and breast milk feeding in, 300

Inflammation
and cell based therapies, role of interleukin 1 (IL-1), in heart failure (HF), 407
non-invasive quantitative T2-MRI using iron oxide nanoparticles, 109
post-transcriptional elements, NLRP3 mRNA stability for, 23
Influenza vaccination, increasing staff compliance with, 273
Injuries and foot strike pattern, characterization of, in ultramarathon athletes, 342
Insulin diet effect, on hypothalamic feeding circuitry to, 437
Insulin-like growth factor-1 (IGF-1), leads to alveolar simplification in the lung at 3 days of ventilation of preterm lambs, 38
Insulin resistance, in adolescent girls with type 2 diabetes, decreased mitochondrial function related to, 149, 189
Insurance, for the uninsured in Twin Falls, Idaho, 68
Intelligence test and molecular subtypes in Prader-Willi syndrome, growth hormone treatment, 200
Intensive care unit neuromuscular blocking agent (NMBA) effect, on first attempt success (FAS) during intubation in, 354
Interferon-gamma, staphylococcus aureus skin disease in an interleukin-17 dependent manner, SAE virulence system, 30
Interleukin-17 dependent manner, SAE virulence system Staphylococcus aureus skin disease in an interferon-gamma, 30 signaling in squamous cell carcinoma, oncogenic potential of, 105
Interleukin 1 (IL-1) role cell based therapies and inflammation, in heart failure (HF), 407
Interpreter services, patient satisfaction survey, at children's hospital of Nevada, after intervention, to improve, 369
Interventional radiology procedures, arterial vascular closure devices in, 238
Intestinal atresias, parental nutrition (PN) duration, and fetal ultrasound findings associated with, 306
Intestinal failure associated liver disease, long-term transplant-free survival and liver function for children, intravenous fish oil and resumed intravenous soybean oil, 195
Intraoperative neurologic monitoring during VEPtr expansion surgery, 223
Intrauterine growth restriction (IUGR), 214
Intervenous access, pediatric perioperative environment, 244
Intrauterine growth restriction (IUGR), histopathologic characterization of placental changes in a murine model of, 214
Intravenous access, pediatric perioperative environment, 244
Intrauterine fish oil and resumed intravenous soybean oil, 195
Intravenous access, pediatric perioperative environment, 244
Intravenous fish oil and resumed intravenous soybean oil, long-term transplant-free survival and liver function in children with intestinal failure associated liver disease, 195
Ipsilateral shoulder pain after thoracotomy, cervical plexus block for, 225
Irinotecan treatment, antitumor activity in colorectal cancer (CRC) model, 421
Iron oxide nanoparticles, inflammation non-invasive quantitative T2-MRI using, 109

Jackson-Pratt drain, placement for post-duodonomy management, 247
July effect, hospital-based plastic surgery practice, 139

Kawasaki disease with arthritis in an 8 year old girl, 55
K562 cells, anti-proliferation activity of, K562 cells, anti-proliferation activity of, 132
Kodex excision and dermal regeneration template application in calcific atrial septal defect, 237
Lactic acidosis, transient type in Sumatriptan, 74
Lag screws vs. bicortical screws in metacarpal fixation, 248
Laser fiber power output, cleave technique effect and time on, 227
Late pregnancy, acute subclinical maternal inflammation in, 346
Lead poisoning, maternal-fetal, 230

Penetration assessment of hemochromatosis, in population of C282Y homozygotes using electronic medical records, 152
Perfusion index, very preterm infants admitted to the neonatal intensive care unit, 211
Safe Environment for Every Kid (SEEK) questionnaire, to identify psychosocial stressors faced by parents, in pediatric resident clinic, as Phase I of QI project, to prevent childhood maltreatment, 335
Salicylic acid, role in Mycobacterium smegmatis, RV3488 promoter expression in presence of, 291
School attended and nutritional status association in schoolchildren in Soroti, Uganda, 148
School children in Soroti, Uganda, the association between school attended and nutritional status in, 148
SCN11A gene mutation as the cause of autosomal-dominant episodic pain in a 3-generation family, 204
Screening, Brief Intervention and Referral to Treatment (SBIRT), use of, with high-risk adolescents, 405
Screening tool for autism in toddlers (STAT), predictive validity of social engagement and atypical behavior scores, 80
Sensory processing abnormalities (SPAs), interconnections with Willis Ekbom disease/legless syndrome, in children, with neurodevelopmental conditions, 401
Sepsis, optimizing chitosan nanoparticles for the treatment of, 32
Serotonin signaling, bronchopulmonary dysplasia and pulmonary arterial hypertension, 115
Sexual and reproductive health, teaching through peer education, 65
Sexual function among aging women with pelvic floor disorders, 236
Sexually transmitted infections through outreach and education in the Yakima Valley migrant farmerwork camps, 274
Shared Decision-Making (SDM) in children with neurodevelopmental disorders, 82
Shorter telomeres association with HIV infected patients, and HIV impact on ageing, 343 and HIV infection, 151
Sickle cell trait (SCT), among whites, 104
Skeletal muscle satellite cells and fibroblasts, vitamin D induces muscle differentiation and promotes an antiinflammatory phenotype in primary cultures of, 187
Small kidneys, impact of, 403
Small molecules therapy, from an induced pluripotent stem cell model to bleomycin mouse model, of idiopathic pulmonary fibrosis, 163
Smoking exposure alters developmentally regulated elastin alternative splicing in the lung of rat pups, maternal tobacco, 41
with prediabetes risk in predominantly Hispanic population, passive and active association of, 14
S-nitrosothiol mediated vasodilation in mesenteric and femoral arteries of adult sheep, L-type Ca2+ channels, 234
Sober mothers, strong babies, addressing maternal substance abuse in Polson, MT, 61
Social media, role in health literacy of, urban underserved teens, 333
Sodium bicarbonate vials, minor surgery, 235
Soft tissue suspension, peribursal uses of a silk derived biological scaffold, 140
Solid tumor patients, immune monitoring of, receiving intratumoral injection of, activated dendritic cells, 383
Soroti, Uganda, association between school attended status in schoolchildren in, 148
Spina bifida, risk of, and heme oxygenase-1 promoter polymorphisms, 295
Spinal instrumentation surgery in children, acute kidney injury following, 220
Spine infection, in vivo mouse model of postoperative Staphylococcus aureus implant related, 144
Spontaneous preterm birth, risk of, associated with changes in pre-pregnancy body mass index (BMI), 303
Sprinting versus non-sprinting approach, randomized controlled trial for, nasal continuous positive airway pressure in premature infants, 166
Sprinting vs. non-sprinting approach, nasal continuous positive airway pressure support in premature infants born at less than 30 weeks gestational age, 217
Squamous cell carcinoma, interleukin-17 signaling in, 105
Standardized test scores, for college entrance among prehealth students, 66
Staphylococcus aureus implant related spine infection, in vivo mouse model of postoperative, 144 in microglia, IgM-mediated phagocytosis, is dependent on complement receptor 3 but not on complement factor 3, 155 skin disease in an interleukin-17 dependent manner, SAE virulence system promotes interferon-gamma, 30
Statin therapy in veteran population, adherence and persistence to, 16
Stroke, adult hypertensive stroke, ipsilateral cortical and deep cerebral venous susceptibility in, 314
Subperiosteal abscesses in pediatrics, risk factors and outcomes, 339
Substance abuse, Sober mothers, strong babies, addressing maternal, 61
Substance and conduct problems in adolescent females, show hypoactivity of retrosplenial cortical region of default mode network, 162
Substance use disorders (SUD) and conduct problems show hypoactivity of the retrosplenial cortical region of the default mode network in adolescent female, 126
Sudden cardiac death (SCD) incidence of post-contrast acute kidney injury in, 88
Sun rat, transient lactic acidosis, 74
Sun Valley Youth Improv Program, addressing adolescent mental health through a theater-based youth development program, 64
Substructural cervical plexus block for ipsilateral shoulder pain after thoracotomy, 225
Superior semicircular canal dehiscence (SSCD) repair, middle fossa craniotomy approach for, 359
Surface APRIL, myeloid cells elevation and disease activity in rheumatoid arthritis patients, 28
Surface E-selectin site density determination, fluorescent vs. radiodination method, 372
Surgeon experience and patient age on flow disruptions in robotic-assisted urogynecology surgery, 251
Susceptibility weighted imaging (SWI) deep medullary vein association on, and poor neurological outcomes, in neonates, with cyanotic congenital heart disease, 319
qualitative vs. quantitative analyses of, deep medullary veins (DMV) on, in pediatric patient, with hypoxic ischemic encephalopathy, 320
Sweet syndrome (SS) and pulmonary hypertension, 53
Systemic arthropathic coxitis wear or corrosion, of chrome-cobalt hip implants, 327
Systemic lupus erythematosus (SLE) changes in demographics and hospital mortality of patients with, in Washington State, 417
pediatric case, of thrombocytopenia purpura (TTP) secondary to, 392
Systemic to pulmonary collateral vessels (SPC), low birth weight infants, 210

Targeted swallowing screening for post-cardiac surgery dysphagia, 239
T cells expressing chimeric antigen receptors with costimulatory CD28 domains, CD28-CD80 costimulation, 103
Teamwork skills, collaborative simulation training, for pediatric residents and nursing students on, 366
Teledermatology in VA Medical Center, post implementation evaluation of, 19
Teleradiology recruitment, volunteer’s perceptions for, at Kenyan mission hospital, 377
Telomerase mutations, lung transplantation for patients with, 131
Tenosynovial rechallenge is an effective treatment for first tumor recurrence in patients with gliblastoma, 124
Teratogenicity determination, rational approaches, to the assessment of clinical evidence in, 297
Terminal bronchiolo, muscleaturization in lung of former preterm lambs, 117
Tertiary hospital center, hypertensive disorders, risk factors for postpartum readmission in, 153
Therapeutic hypothermia in neonates with hypoxic ischemic encephalopathy, cerebral lactate concentration, 213
Though nasal continuous positive airway pressure (NCPAP) spraying versus non-spraying approach, support in premature infants born at less than 30 weeks gestational age, 217
Thrombocytopenia purpura (TTP), pediatric case of, secondary to systemic lupus erythematosus (SLE), 392
T790M mutations role, in non-small cell lung cancer (NSCLC) disease characteristics and treatment response, 422
TNFα production, phosphol myristate acate (PMA) induces in macrophages, after differentiation through protein kinase C (PKC) activation, 426
Topoisomerase II alpha inhibitors, derivatives of necamphimedine, 150, 193
Torque Teno virus (TTV) deep DNA sequencing of ocular surface DNA, 287
Torrington condom availability program, chlamydia infection, 59
Total artificial heart (TAH), antibody production in patients despite more blood transfusions, 87
Total knee arthroplasty (TKA), adverse events before and after the implementation of a multimodal peri-operative pain control regimen for, 143
Total parenteral nutrition (TPN) calculation, improvement in efficiency, using mobile application for, 302
Tracheo-esophageal fistula, resulting from genetic mesodermal interruption of hedgehog signaling in mice, 215
TRACH-Safe education and simulation course, 367
Transgender effect of coping style on linkage to care and mental health, HIV infected men who have sex with, 36
HIV testing in high-risk men who have sex with, 35
Triglyceride hypertolerance in patients on parenteral nutrition, 12
Tuberculosis factors that influence mycobacterium tuberculosis culture results in patients diagnosed with, 34
socio-economic, clinical, and behavioral factors associated with study retention among patients in Botswana, 33
Tubulo-villus adenoma mimicking a small bowel tumor, distal ileal stricture due to, 197
Two-photon imaging of albino rabbit retina, 256
and retinal toxicity in brown Norway rats, fluorescence type, 253
Type 1 diabetes (T1D), endothelial dysfunction in adolescents, 13
Type 2 diabetes (T2D) antioxidant N-acetylcysteine does not improve glucose tolerance or β-cell function in, 188
decreased mitochondrial function related to insulin resistance in adolescent girls with, 149, 189
onset in obese non-human primates, HDL-mediated eNOS activation falls before, 11

Underrepresented in Medicine (URM) students, 363
Urban underserved teens, health literacy of, role for social media, 333
Urinary stent insertion using an ex vivo porcine model, 241
Urosepsis and acute renal failure, as failure to gain weight, in well appearing neonates, 400

Vaccination and immunization rates, improving knowledge about, among adolescents, in Lake Pend Oreille School District (LPOSD) in Idaho, 402
Vancouver classification system, for airway management in Pierre Robin Sequence (PRS), 364
Vascular disease patients adiposopathy, in perivascular adipose tissue of, 322
Vascular endothelial cell network, oscillatory gene expression in BMP-4/9, 2
Vascular regrowth in a mouse model of retinopathy, characterizing the role of the alternative Complement pathway in, 27
Vasodilator-stimulated phosphoprotein are affected by ventilation mode in preterm lambs, protein abundance and phosphorylation level of, 37
Venous susceptibility, ipsilateral cortical and deep cerebral, in adult hyperacute stroke, 314
Ventricular hypertrophy, histone deacetylase inhibition abrogates hypoxia-induced right, 4
Vertical expandable prosthetic titanium rib (VEPTR) device, intraoperative neurologic monitoring, 223
Very low birth weight infants delivery room intubation rates after resuscitation using modified nasal cannula in, 218
cerebral blood flow in preterm, 207
Vestibular Schwannoma (VS), diffusion tensor imaging (DTI) tractography, for facial nerve imaging, in patients with, 363
Veteran population adherence and persistence to statin therapy in, 16
Veterans affairs (VA) rheumatology fellows, patient characteristics associated with psychological safety among, 374
Voriconazole desensitization, in patients with, multiple drug hypersensitivity (MDH), 429

Walking School Bus (WSB) program, to increase physical activity and active transportation, of children in Ellensburg, 334
Washed packed red blood cells (pRBC) and necrotizing enterocolitis in extremely preterm infants, 209
WDR45 related disease, static developmental delay with late progression to neurodegeneration, 203
Western Ontario and McMaster Universities Osteoarthritis Index (WOMAC) pain score, correlation between actual pain levels and, 428
Whole body hyperthermia, major depression, 262
Wnt pathway dependencies, mapping and characterization of, in non-small cell lung cancer (NSCLC), 423
Wound healing, in oral epithelium,igmik and Copenhagen® effect on, 345
WWAMI Students, palliative medicine course, 75

Xenograft model, disease mechanisms identification and therapies for CRLF2 B cell acute lymphoblastic leukemia, 106

Youth development program, Sun Valley Youth Improv Program, addressing adolescent mental health through a theater-based, 64

Zinc deficiency on offspring satiety, glucose homeostasis and growth, 10
protoporphyrin microparticle formulation, in vivo inhibition, of heme oxygenase (HO) activity, in heme-loaded newborn mouse using, 430
Zolpidem vs Midazolam, as oral premedication, in children, 176
